

Part Two/Chapter Seven

SCENIC TOOLS AND MATERIALS

DISCUSSION QUESTIONS:

1. Summarize the three categories relating scenic tools. Describe the intended uses of each.
2. Relate the framing, combination, and speed square tools to each other. Give examples of why each is appropriate in different situations.
3. Illustrate the differences between using a hand drill and using a drill press.
4. Analyze the design of a rip and a crosscut saw blade in order to explain the specific uses for each.
5. Contrast any hammer against a mallet in terms of functionality.
6. Describe the correct situations for proper use of screws versus nails versus bolts.
